

Railway Exam Overview

Railway

Introduction to Railway Exams

The Railway Recruitment Board (RRB) conducts various exams to recruit candidates for different posts in the Indian Railways. Among these exams, RRB NTPC and Group D are two of the most popular and sought-after exams. In this overview, we will discuss the pattern and structure of these exams to help students prepare effectively.

RRB NTPC Exam Pattern

The RRB NTPC exam is conducted to recruit candidates for non-technical popular categories (NTPC) posts such as station master, goods guard, and junior clerk. The exam pattern consists of two stages: First Stage Computer Based Test (CBT) and Second Stage Computer Based Test (CBT). The first stage CBT is a qualifying exam, and the candidates who qualify will be eligible to appear for the second stage CBT. The second stage CBT is a merit-based exam, and the candidates will be selected based on their performance.

- The first stage CBT consists of 100 multiple-choice questions, with a time duration of 90 minutes.
- The questions will be based on mathematics, general intelligence and reasoning, general awareness, and general science.
- The second stage CBT consists of two parts: Part A and Part B. Part A consists of 120 multiple-choice questions, with a time duration of 90 minutes. Part B consists of 60 multiple-choice questions, with a time duration of 60 minutes.
- The questions in Part A will be based on mathematics, general intelligence and reasoning, general awareness, and general science. The questions in Part B will be based on the specific post applied for.

RRB Group D Exam Pattern

The RRB Group D exam is conducted to recruit candidates for group D posts such as track maintainer, pointsman, and helper. The exam pattern consists of a single stage Computer Based Test (CBT). The CBT consists of 100 multiple-choice questions, with a time duration of 90 minutes. The questions will be based on mathematics, general intelligence and reasoning, general awareness, and general science.

- The CBT will have negative marking, and 1/3 of the marks will be deducted for each incorrect answer.
- The candidates who qualify the CBT will be eligible to appear for the Physical Efficiency Test (PET).
- The PET will consist of tasks such as running, lifting, and carrying, which will test the physical fitness of the candidates.

Preparation Strategy

To prepare for the RRB NTPC and Group D exams, students should focus on building a strong foundation in mathematics, general intelligence and reasoning, general awareness, and general science. They should practice solving multiple-choice questions and take mock tests to improve their speed and accuracy. Students should also focus on their physical fitness and prepare for the PET, which is a crucial stage in the selection process.

The key to success in these exams is to practice consistently and stay focused on the goal. Students should make a study plan and stick to it, and they should also take breaks to avoid burnout. With dedication and

hard work, students can crack the RRB NTPC and Group D exams and secure a job in the Indian Railways.
